## *Our Wedding Budget*

*Before planning your wedding, it is important to know what you want and what you can afford. The best way to do this will be to distribute approximately 50% of your budget for the reception and the other 50% should be redistributed like this: 10% for the flowers, 10% for the photography, 10% for the outfits and 10% for the music, leaving the remaining 10% for gifts and other situations that might come.*
